FURNISHING SHUTTER

ME 30 U | ME 30 R | ME 30 S

ME 30 U ME 30 R | ME 30 S

Aluminum Rullar furnishing shutters are designed and manufactured in Finland. The starting point for the design has been Scandinavian architecture. Kokema Oy has nearly 40 years' experience in the manufacture of furnishing shutters. The lightweight and durable material creates a high quality, stylish design without compromising the ease of use of the furnishing shutters. Rullari furnishing shutters are CE certified (EN13241). Furnishing shutters are reliable and safe to use. They are suitable for both indoor and outdoor use. Furnishing shutters are manufactured according to the customer's specifications and professional installation service all over Finland manages the installation of the gates flexibly. Uses include various cabinets, customer service points, restaurants, kiosks, etc...

SLAT CURTAIN

The slat curtain of the Rullari furnishing shutter consists of a 30 mm wide extruded aluminium profile, and the profile ends are locked together by means of screws. The ME 30 U slat is closed and the ME 30 R slat is perforated either with rectangle holes or oval holes. The maximum size of the furnishing shutter is 1500 x 1500 mm. The weight of the furnishing shutter is approx. 6 kg/m².

GUIDE RAILS, FIXING ANGLES, ROLLER BARREL

The furnishing shutter runs either on upper and on lower guide rails or on the side guide rails (18 x 22 mm), which are also extruded aluminum. The guide rail can be bent with R = 65 mm radius. The guide rails are always delivered in powder coated RAL Classic tones.

OPERATION

Rullari furnishing shutters are always hand-operated. Usually in furnishing shutters, the slat curtain moves to the back of the furniture without any separate mechanism. The furnishing shutters can also be equipped with a spring-supported roller barrel, whereupon the slat curtain rolls on the shaft. The furnishing shutters have a pull slat, from which the curtain is pulled to the closed position and pushed into the open position.

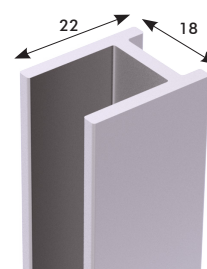

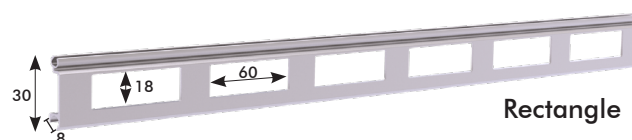

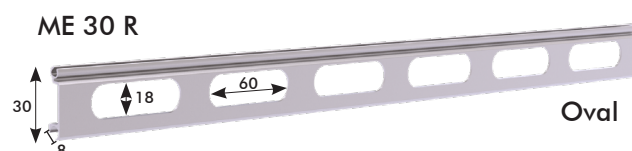

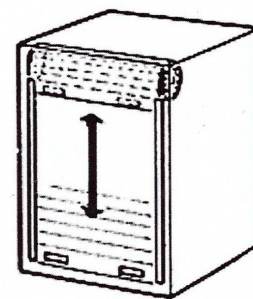

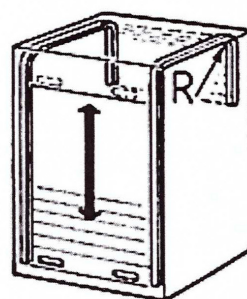

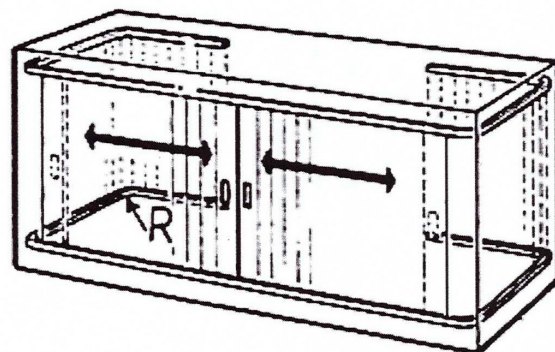

LOCKING

The Rullari furnishing shutters are equipped with a lever bolt locking.

SURFACE TREATMENT

The furnishing curtains are delivered with standard natural color anodizing. The curtains can also be powder coated with RAL Classic color tone or color anodized.
