ProfilPACK®

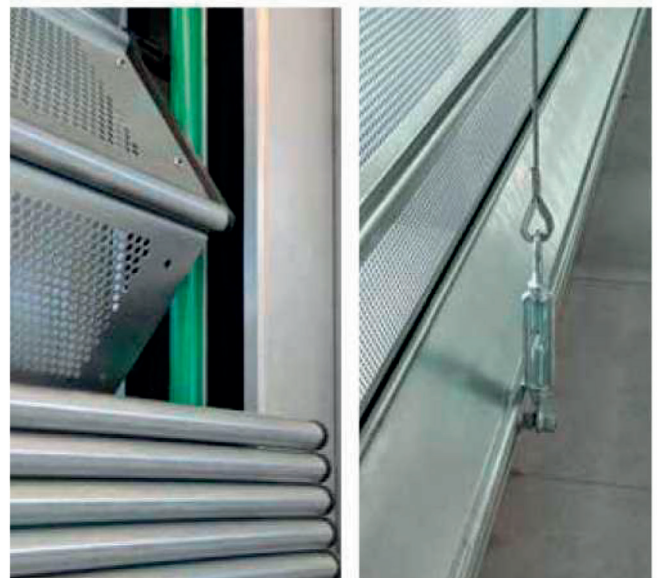

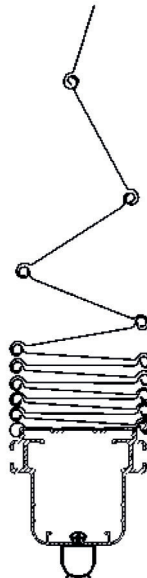

**Protection for large size
ceiling-mounted telescopic**

BLIND OR MICRO-PERFORATED

ProfilPACK® is a packable protection made of profiles in high-strength and realized with high quality materials. The simple design and construction characteristics guarantee a valid anti-intrusion barrier.

- Modular construction and easy assembly without the need for lifting means
- No width restrictions
- Overall dimensions of the application reduced to a minimum (60 x 60 mm "U" guides and 20% of the upper part of the aperture with the barrier fully raised)
- Standard finish in hot galvanized steel (can be painted in any colour required)

It can be made of full or microperforated steel. Finishing can be galvanized steel or painted galvanized steel, in any color.

Width without limits

IMPACK®

Protection for large size ceiling-mounted telescopic

GRILLES

The **IMPACK®** modular barrier is a new closing system for big dimensions designed to fully comply with current regulations. Specifically designed for large shopping areas (checkout line closures, shopping malls, etc.) the main characteristics of this system are:

IMPACK® is ideal for closing off:

- checkout lines
- shopping malls
- large store windows
- subdivisions of large areas

Materials and finishes

- Standard finish: Hot galvanized steel
- On request: RAL colours
